Self Portrait an art challenge

If you are interested in Art, then this is the challenge for you!

Unlike a selfie, a self-portrait is intended to be an exploration of your face, body and personality.

Many artists have done self-portraits of themselves, including the Mexican artist Frida Kahlo, who painted herself 55 times and Vincent van Gogh who did 30 self-portraits!

For our Aspire challenge find out about an artist who has done self-portraits of themselves and present your findings along with your own self-portrait.

Using a medium of your choice create a self-portrait that is no larger than A3. The challenge is to capture something of your likeness and personality in this portrait.

Remember to be innovative and creative and that sometimes less is more.

Success Criteria:

Information about an artist who does self-portraits.

Your image is no larger than A3 sized

Your self portrait is clearly identifiable as you

The work is your own

You have been innovative and creative in your use of mediums and techniques
